

This vehicle had a service action carried out in 2022 because it had noises in the panoramic skylight, for more than 6 months it has had air intakes through the skylight again. the additional closures that were put in place have been degraded. Dometic does not offer me a solution and Paul has written to me to process a warranty request so that they send me the necessary material for the repair.

I write the old repair material that I need. If you have any questions, you can send me an email.
